Toni,

Andy is out today. Here is what he recently sent to me for item #1 (see below)

Deliberative Process / Ex. 5

Mark

Here's the REACH dossier for GenX:

<https://echa.europa.eu/registration-dossier/-/registered-dossier/2679/1>

And the biodegradation assessment:

<https://echa.europa.eu/registration-dossier/-/registered-dossier/2679/5/3/1>

Details of the tests here:

<https://echa.europa.eu/registration-dossier/-/registered-dossier/2679/5/3/2>

Additional Information

The test substance is not Ready Biodegradable based on the results of a ready biodegradation test (TG OECD 301B). The test substance is expected to be not biodegradable. The rate constant (k) for elimination in sewage treatment plant is 0 (h⁻¹). The table below lists the various degradation rates.

Degradation rate in water:	k = 0 d ⁻¹ ; not ready biodegradable, not fulfilling specific criteria (ECHA (2008) Guidance on Information, Requirements, and Chemical Safety Assessment, Chapters R.16.16.4.4.5 and R.7B, pg. 175)
Degradation rate in sediment:	k _{bio,sed} = 0 d ⁻¹ ; not ready biodegradable, not fulfilling specific criteria (ECHA (2008) Guidance on Information, Requirements, and Chemical Safety Assessment, Chapters R.16.16.4.4.5 and R.7B, pg. 175)
Degradation rate in soil:	k _{bio,soil} = 0 d ⁻¹ ; not ready biodegradable, not fulfilling specific criteria (ECHA (2008) Guidance on Information, Requirements, and Chemical Safety Assessment, Chapters R.16.16.4.4.5 and R.7B, pg. 175)
Degradation rate in air:	Not Determined

Hi Mark and Andy,

Hope all is well!

In preparing responses to the media inquiries we've been getting related to the Cape Fear River Watershed results (<http://pubs.acs.org/doi/pdf/10.1021/acs.estlett.6b00398>), I had a few questions that I hope you can help me with:
